Each model's make-up will express each of the 4 symbols

My pack of playing cards, we're releasing one a week, we started with the ace of spades. Everything's connected, you can collect them like football cards; it is also a plan of action, a survey map. If we connect the dots, we can win the fight for the free world, first step: Switch to Green Energy Supplier.

- We have a print using all four symbols.

We will begin with natural white covered with rainforest print – small black circles looking like a spotty animal print but which are really meant to be the noughts which endlessly multiply money by 10 over and over. We only need a few to Save the Rainforest but billions disappear every day in global inflation. Other graphics will be in the form of texts – black on natural white.

We will add separate pieces to these basic looks: No fashion theme – just half dressed. Perhaps a shirt which in one go shows you the most *shirtlikeshirt*: Platonic! Silly? You will see the *jacketwhichsaysjacket*, the *mostdynamicjacket*, a *jokeofjeans*, the *universalshortesttrouser*, a *gestureofasweater*; the most sexy dress, should it be worn on the oldest person in the world on top of a net t-shirt. The dress has a cave print of hunter gatherers, moving across the land, following the reindeer. Will we survive our evolution. Don't panic.
